WORK EXPERIENCE

15 FEB 2021 – CURRENT – Ljubljana, Slovenia

CEO & Co-Founder

Aerio

As the Co-Founder and CEO of Aerio, I am responsible for managing every aspect of our workflow; the staff, new deals, and the development processes.

As CEO I still collaborate on projects and am one of the two team members who collaborate on every project in the company.

19 NOV 2020 – CURRENT – Ljubljana, Slovenia

Developer

IPM Komunikacije d.o.o.

In the company IPM Komunikacije d.o.o. I initially collaborated with a team of three developers on a project which used the technology Vue.js for the frontend and NodeJS for the backend. Later on, I worked with a five-person team on a project using the Flutter framework for the mobile app and NodeJS for the backend.

16 MAY 2021 – 6 NOV 2021 – Ljubljana, Slovenia

IT Team Lead

Fundl | More4Youth d.o.o.

I joined More4Youth as one of the first two developers and worked on the main product of the company, Fundl (https://fundl.si).

19 JUN 2019 – 19 AUG 2021 – Ljubljana, Slovenia

Lead Developer

YFLab d.o.o.

At the YourFlare startup, that progressed into the company YFLab d.o.o., my initial task was to create a web app for clients to use as their main interaction tool for communication with our product. It was developed using NodeJS and Handlebars. Later on, we wanted to create a mobile app, so I took on that task and started the development of our mobile app in the Flutter framework.

After being a developer there for less than a year, I took on the task of overseeing the development and also creation and maintaining of the internal tools used for business processes.

PROJECTS

2019 – 2020

Usability of LoRa technology in IoT within cities (translated title)

https://drive.google.com/file/d/1RLZ30Z8pIeJcdz7t-ljr0SeKp4QhmL9N/view?usp=sharing

In collaboration with a fellow student (Urh Jamšek), I researched the usability of LoRa technology in IoT within cities. We build 5 weather stations, which communicated to a central station via LoRa technology in the city Ljubljana. The data was then sent to a MariaDB database and then displayed to a UI built in PHP. The software for the weather station was written in C++ modified for the Arduino boards

EDUCATION AND TRAINING

1 SEP 2018 – CURRENT – Vegova ulica 4, Ljubljana, Slovenia

Computer Science

Elektrotehnično-računalniška strokovna šola in gimnazija Ljubljana (Vegova)

https://www.vegova.si/

LANGUAGE SKILLS

MOTHER TONGUE(S): Slovenian

OTHER LANGUAGE(S):

English

Listening	Reading	Spoken production	Spoken interaction	Writing
C1	C1	C1	C1	B2

German

Listening	Reading	Spoken production	Spoken interaction	Writing
A1	A1	A1	A1	A1

DIGITAL SKILLS

Front-End development

HTML / WordPress / CSS / Flutter / React.js / Vuejs / CSS Frameworks (i.e., Bootstrap, Materialize CSS, Tailwind)

Back-End Development

NodeJS / Dart / TypeScript / JavaScript / JSON / RESTful api / MongoDB / PHP / Rust / Strapi / C++ / Firebase / SQL (MySql, SQLite, PostgreSQL, SQL Server) / Python

DevOps, Tools & Other

Git / Grafično oblikovanje (Adobe Photoshop, Canva, Adobe Illustrator). / Socialna omrežja (Facebook, Instagram, Twitter) / Bash, Zsh, Shell, Batch, JCL / Linux / Insomnia / Figma / MS Office (Word PowerPoint Excel) / Object-Oriented Programming / Arch Linux / Postman

HOBBIES AND INTERESTS

Programming

In my spare time, as well as at work, I regularly do programming.

I have taken on many projects individually and also with my friends.

As a hobby, I use programming in programs such as Discord bots.

Two of the most active are DotBot, which is a Discord bot that is designed as a utility bot for members and administrators.

Another bot is GPTree, which as a Discord bot incorporates the API for GPT-3, which I got a private beta from OpenAI.

Another project I've been working on in my spare time is an API and application for things that are connected to the internet in my room (the link to GitHub is below).

I've been working on a lot of projects, which you can find under my repositories on GitHub and the organizations I'm in on GitHub.

https://github.com/aikenahac https://github.com/aeriotech/gptree https://github.com/aikenahac/room-app https://github.com/aikenahac/room-api https://github.com/aikenahac/dotbot
