PROFILE

Product-focused frontend engineer with 7+ years shipping startup software across web and mobile. I build React, Next.js, TypeScript, and React Native applications, and take on the backend work needed to ship a feature cleanly. I work best in small teams where the problem is still being shaped while the product is being built.

SELECTED EXPERIENCE

Preskok d.o.o. 2025 – present
Senior Software Developer

- › Build guided vehicle-capture workflows in React Native, including offline behavior and resilient upload queues.
- › Develop React and Next.js operational tools handling 1,000+ vehicles with hundreds of properties.
- › Reduced the production build time by 90% within my first two weeks.

eAsistent eŠola 2022 – 2025
Software Developer

- › Contributed to products used by 100k+ students, 70k+ kindergarten parents, and 200k+ parents of schoolchildren.
- › Moved into a small team building Next.js administration workflows for schools.
- › Built table-heavy interfaces and revision-history tools for operational processes.

Aerio 2021 – present
Co-founder

- › Build and guide small software projects across web and mobile.
- › Handle technical direction, client communication, delivery tradeoffs, and hands-on implementation.

CORE TOOLS

PRODUCT UI
React · Next.js · SvelteKit

MOBILE
React Native · Flutter

LANGUAGE
TypeScript · JavaScript

SERVER
Node · NestJS · PHP

DATA
PostgreSQL · MySQL

WHAT I OPTIMIZE FOR

- › Clear product behavior
- › Small component APIs
- › Resilient data flows
- › Accessible interaction
- › Performance that users notice

ROLE TARGET

Senior frontend or product-engineering work with a fully remote team able to work B2B in Europe. Also willing to relocate with support.

SELECTED WORK & BACKGROUND

EARLIER EXPERIENCE

Vegova Ljubljana

2023 – 2024

Computer Science Teacher

- › Taught a practical course covering human-computer interaction, client communication, agile work, web design, and image processing.

YFLab

2019 – 2021

Lead Developer

- › Built customer web and mobile products, then took responsibility for development and internal tools.

Fund1

2021

CTO & Co-founder

- › Worked across the mobile app, website, administration, technical direction, and coordination with design and business teams.

Identisoft

2022

Software Developer · Erasmus

- › Integrated healthcare-device SDKs into Android applications for measurement control and visual feedback.

OPEN-SOURCE PROOF

gigatable

A source-installed React data grid for TanStack Table with editable cells, range selection, Excel-compatible copy and paste, fill handles, virtualization, and undo/redo.

gigatable.dev
github.com/aikenahac/gigatable

mapcn-react-native

Reusable React Native map components with Mapbox and MapLibre support. The project shows the part of frontend work I enjoy most: a focused public API over platform-specific behavior.

mapcn-rn.dev
github.com/aikenahac/mapcn-react-native

EDUCATION

University of Ljubljana

Faculty of Computer and Information Science · Computer science studies, 2023 – 2024

Vegova Ljubljana

Computer science technical program, 2018 – 2023

WORKING STYLE

- › Start with the user and the constraint.
- › Show work before it feels finished.
- › Keep consequential decisions written down.
- › Say when something is uncertain.
- › Treat accessibility and performance as behavior.

LANGUAGES

Slovenian · native
English · professional
German · limited working
