WORK EXPERIENCE

01/02/2021 – CURRENT – Ljubljana, Slovenia

Founder

Aerio

Aerio is a project and a soon to be company, focusing on software development.

We're a young team of developers who wants to provide everyone with affordable websites.

Our projects have mostly been either websites for smaller companies or startups, and software and apps that we were outsourced for by other companies.

As one of the two leaders, I spend most of my time overseeing the development, setting up new projects and collaborating on projects.

15/11/2021 – CURRENT – Ljubljana, Slovenia

Marketing Team Lead & Developer

SimpliServers

I joined SimpliServers, which is a server hosting provider, and took on the task of managing and creating content for all of our social media platforms, such as Instagram, Twitter, TikTok and more.

Due to my technical skills, I also collaborate on in-house development projects.

19/11/2020 – CURRENT – Ljubljana, Slovenia

Developer

IPM Komunikacije d.o.o.

In the company IPM Komunikacije d.o.o. I initially collaborated with a team of three developers on a project which used the technology Vue.js for the frontend and NodeJS for the backend. Later on, I worked with a five-person team on a project using the Flutter framework for the mobile app and NodeJS for the backend.

16/05/2021 – 06/11/2021 – Ljubljana, Slovenia

IT Team Lead

More4Youth d.o.o. | Fundl

I joined More4Youth as one of the first two developers and worked on the main product of the company, Fundl.

19/06/2019 – 19/08/2021 – Ljubljana, Slovenia

Lead Developer

YFLab d.o.o.

At the YourFlare startup, that progressed into the company YFLab d.o.o., my initial task was to create a web app for clients to use as their main interaction tool for communication with our product. It was developed using NodeJS and Handlebars. Later on, we wanted to create a mobile app, so I took on that task and started the development of our mobile app in the Flutter framework.

PROJECTS

2019 – 2020

Usability of LoRa technology in IoT within cities (translated title)

https://drive.google.com/file/d/1RLZ30Z8pIeJcdz7t-ljr0SeKp4QhmL9N/view?usp=sharing
In collaboration with a fellow student (Urh Jamšek), I researched the usability of LoRa technology in IoT within cities. We build 5 weather stations, which communicated to a central station via LoRa technology in the city Ljubljana. The data was then sent to a MariaDB database and then displayed to a UI built in PHP. The software for the weather station was written in C++ modified for the Arduino boards

29/10/2020 – CURRENT

VegaHQ Podcast

VegaHQ podcast was a project I started with a friend of mine. We hosted a podcast on the popular platform Twitch on a weekly basis.

On the podcast we discussed and explored many varying topics. We talked about actual topics such as space exploration, current scientific events and discoveries, conspiracy theories, gender topics and much more.

Within this project I actively developed my communication and audio/video skills. My colleagues and I also had to develop skills to plan content for a 2 hour live podcast every week.

EDUCATION AND TRAINING

01/09/2018 – CURRENT – Vegova ulica 4, Ljubljana, Slovenia

Computer Science

Elektrotehnično-računalniška strokovna šola in gimnazija Ljubljana (Vegova)

https://www.vegova.si/

LANGUAGE SKILLS

MOTHER TONGUE(S): Slovenian

OTHER LANGUAGE(S):

English

Listening	Reading	Spoken production	Spoken interaction	Writing
C1	C1	C1	C1	B2

German

Listening	Reading	Spoken production	Spoken interaction	Writing
A1	A1	A1	A1	A1

DIGITAL SKILLS

Front-End Development

React.js / Vuejs / CSS / Flutter / CSS Frameworks (i.e., Bootstrap, Materialize CSS, Tailwind) / Bootstrap / HTML / ReactNative

Back-End Development

NodeJS / Dart / JSON / TypeScript / JavaScript / Firebase / RESTful api / PHP / Python / C++ / Strapi.io / SQL (MySql, SQLite, PostgreSQL, SQL Server) / MongoDB / Go / Object-Oriented Programming

Tools & other

Bash, Zsh, Shell, Batch, JCL / Arch Linux / Linux / Postman / Git / Figma / Insomnia

HOBBIES AND INTERESTS

Programming

In my spare time, as well as at work, I regularly program. I have taken on many projects individually as well as with my colleagues.

As a hobby, I use programming in programs such as Discord bots. Two of the most active are DotBot, which is a Discord bot that is designed as a utility bot for members and administrators. Another bot is GPTree, which as a Discord bot incorporates the API for GPT-3, which I got a private beta from OpenAI.

Another project I've been working on in my spare time is an API and application for things that are connected to the internet in my room.

I've been working on a lot of projects, which you can find under my repositories on GitHub and the organizations I'm in on GitHub.
